\*E-mail of corresponding author

+Additional remarks that might be necessary

## **Extended abstract**

An extended abstract should have between 700 and 1,200 words (excluding references). You should use this submission template to format your extended abstract.

You are free to develop an individual structure for your extended abstracts. It should at least contain the main text, titled "Extended abstract", keywords, and a reference list.

The text must clearly describe the problem that is addressed, the methods that are applied, the results that have been obtained (or that are to be expected), and (preliminary) conclusions.

It is important to be clear about the contribution to the session to which the extended abstract is submitted and to the overall conference theme.

**IMPORTANT:** You also must submit an additional 250-word summary accompanying this extended abstract. The additional 250-word abstract will be used for the printed conference proceedings. It must be entered in the

“Abstract” field of the [registration and submission system](#) (ConfTool) upon submission.

## Keywords

Please enter up to five keywords for your contribution here, separated by commas.

## References

Use Harvard citation style to format in-text references as well as the reference list. A guide can be found here: <https://www.imperial.ac.uk/media/imperial-college/administration-and-support-services/library/public/harvard.pdf>
