Abstract

A full paper should have up to 6,000 words (excluding references). You should use this submission template to format your full paper. You are free to develop an individual structure for your full paper.

A full paper must include a 250-word abstract by default and thus does not need an additional summary. The 250-word abstract must be copied in the "Abstract" field of the [registration and submission system](#) (ConfTool) upon submission.

We recommend considering the full paper requirements of the Journal of Business Models: <https://journals.aau.dk/index.php/JOBM/information/authors>

Keywords

Please enter up to five keywords here, separated by commas.

Main text

The text must clearly describe the problem that is addressed, the methods that are applied, the results that have been obtained, and conclusions.

It is important to be clear about the contribution to the session to which the full paper is submitted and to the overall conference theme.

References

Use Harvard citation style to format in-text references as well as the reference list. A guide can be found here: <https://www.imperial.ac.uk/media/imperial-college/administration-and-support-services/library/public/harvard.pdf>
