+Additional remarks that might be necessary

## **Abstract**

A short paper should have up to 2,500 words (excluding references). You should use this submission template to format your short paper. You are of free to develop an individual structure for your short paper.

A short paper must include a short abstract of about 50 words. In addition, a 250-word summary must be entered in the “Abstract” field of the [registration and submission system](#) (ConfTool) upon submission.

We recommend considering the short paper requirements of the Journal of Business Models: <http://journalofbusinessmodels.com/short-papers-repository/>

## **Keywords**

Please enter up to five keywords here, separated by commas.

## Main text

The text must clearly describe the problem that is addressed, the methods that are applied, the results that have been obtained (or that are to be expected), and (preliminary) conclusions.

It is important to be clear about the contribution to the session to which the short paper is submitted and to the overall conference theme.

**IMPORTANT:** You also have to submit an additional 250-word summary accompanying this short paper. The additional 250-word summary will be used for the printed conference proceedings. It must be copied to the abstract field in ConfTool upon submission of your short paper.

## References

Use Harvard citation style to format in-text references as well as the reference list. A guide can be found here: <https://www.imperial.ac.uk/media/imperial-college/administration-and-support-services/library/public/harvard.pdf>
